IN THE CLAIMS:

Please amend the claims as follows:

1. (currently amended) A cellular telephone comprising:  
a first part having a longitudinal axis substantially in the center of the first part,  
the first part including a display; and  
a second part coupled to the first part by a pivot mechanism that includes a pivot  
axis that makes an angle of less than ninety degrees with the longitudinal axis of the first part,  
whereby the second part can be oriented to face different azimuthal angles about the longitudinal  
axis of the first part, the second part including a camera; and  
a third part connected to the first part by a hinge that includes a hinge axis, the  
third part including a keypad.
2. (canceled)
3. (original) The cellular telephone according to claim 2 wherein:  
the hinge axis is normal to the pivot axis.
4. (original) The cellular telephone according to claim 1 wherein:  
the pivot axis makes an angle of less than 20 degrees with the longitudinal axis.
5. (original) The cellular telephone according to claim 4 wherein:  
the pivot axis makes an angle of less than 15 degrees with the longitudinal axis.
6. (original) The cellular telephone according to claim 1 wherein:  
the first part comprises a first surface;  
the second part comprises a second surface located adjacent the first surface of the  
first part; and  
the pivot mechanism comprises:

Serial No. 10/693,248

a pinion extending from one of the first and second surfaces; and  
a hole formed in another of the first and second surfaces, wherein the pinion  
extends into the hole.

7. (original) The cellular telephone according to claim 6 further comprising:  
a spring seat located in one of the first and second parts, around the hole;  
a spring retainer attached to the pinion; and  
a coil spring located around the pinion between the spring seat and the spring  
retainer.
8. (original) The cellular telephone according to claim 6 further comprising:  
an annular, axially acting cam disposed on one of the first and second surfaces;  
and  
an annular, axially engaging follower disposed on another of the first and second  
surfaces, and positioned to engage the axially acting cam.
9. (original) The cellular telephone according to claim 8 wherein:  
the annular axially acting cam is concentric to the pinion; and  
the annular axially engaging follower is concentric to the hole.
10. (currently amended) The cellular telephone according to claim 1 wherein:  
~~the first part comprises a first display; and~~  
the second part comprises a second display.

11-14.

15. (original) The cellular telephone according to claim 14 wherein:  
the second part comprises a display, wherein the display and the camera face in  
opposite directions.

Serial No. 10/693,248

Page 4

16. (original) The cellular telephone according to claim 1 further comprising:  
a stop mechanism for limiting rotation of the first part relative to the second part.
17. (currently amended) A flip type portable telephone comprising:  
~~a lower half first section including a keypad; and~~  
~~a flip second section connected to the first section coupled to lower half by a~~  
hinge, wherein the flip section comprises:  
~~a lower first part that is coupled to the hinge, the lower part of the flip first~~  
~~part comprising a first display; and~~  
~~a pivoting head coupled to the lower first part by a pivot, wherein the~~  
~~pivot allows the pivoting head to be oriented to face different directions, and wherein the~~  
~~pivoting head includes a camera.~~
18. (original) The flip type portable telephone according to claim 17 wherein:  
the pivoting head comprises a camera and a display that face in opposite  
directions.
19. (original) The flip type portable telephone according to claim 18 wherein:  
the pivoting head further comprises an earpiece speaker.
20. (new) A cellular telephone comprising:  
a first part having a longitudinal axis, the first part including a display; and  
a second part coupled to the first part by a pivot mechanism that includes a pivot  
axis that makes an angle of less than ninety degrees with the longitudinal axis of the first part,  
whereby the second part can be oriented to face different azimuthal angles about the longitudinal  
axis of the first part,  
wherein  
the second part comprises a first surface and a second surface;

Serial No. 10/693,248

Page 5

the pivot axis is tilted with respect to the longitudinal axis by an angle of alpha;  
and

the first surface and the second surface are tilted in opposite directions with  
respect to the pivot axis by the angle alpha.

21. (new) The cellular telephone according to claim 20 wherein:  
the first part comprises a third surface and a first display located at the third  
surface; and  
the second part comprises a second display that is disposed at the first surface of  
the second part.
  
22. (new) The cellular telephone according to claim 20 further comprising:  
a third part coupled to the first part by a hinge, that includes a hinge axis, wherein  
the hinge axis is perpendicular to the longitudinal axis.
